

Nigerians.africa

SUMMARY

Nigerians.africa is a public digital civic institution for Nigeria. It is a public information and memory infrastructure that makes Nigeria's government, people, problems, money, projects, evidence and history visible and connected.

PRODUCT IDENTITY & DESIGN DIRECTION

Nigerians.africa is a public digital civic institution for Nigeria.

It is a public information and memory infrastructure that makes Nigeria's government, people, problems, money, projects, evidence and history visible and connected.

The product should feel like entering a public space where the country can be explored, understood, investigated and remembered.

The desired feeling is: "I am looking at Nigeria." rather than "I am logged into an application."

Possible supporting description: "A public record of Nigeria."

Core loop: Discover → Understand → Verify → Act → Track → Remember.

PRODUCT PHILOSOPHY

The platform remembers. Citizens decide.

The system should preserve facts, evidence, sources, claims, responses, disagreements, decisions, projects, money, outcomes and history.

Information → Understanding → Evidence → Accountability → Action → Outcome → Memory.

DESIGN PRINCIPLES

- Public by Default - The Record Is the Interface - Evidence First - History Should Be Visible - Action Without Pressure - Relationships Over Silos

Defining connected flow: Problem → Office → Person → Promise → Money → Project → Evidence → Response → Outcome → Memory.

VISUAL PERSONALITY

Overall aesthetic: Modern civic institution + investigative publication + geographic intelligence.

Prefer strong typography, generous whitespace, editorial layouts, maps, timelines, evidence panels, source references, restrained status colors, geographic visualizations, tables, and clear hierarchy.

Avoid generic admin dashboards, gamification, social-media feeds, political-party aesthetics, sensational news styling, excessive gradients, and dense analytics dashboards.

GLOBAL NAVIGATION

Navigation should feel like a public website.

Primary sections: Government, Problems, Money, Projects, Places, People, Action.

No permanent authenticated sidebar.

CORE USER JOURNEY ARCHITECTURE

Journey families include: - Discovery Journey - Responsibility Journey - Investigation Journey - Public Personality Journey - Reporting Journey - Verification Journey - Follow-the-Money Journey - Locality Journey - Civic Guidance Journey - NGO / Organization Action Journey - NGO / Project Support Journey - Election Journey - AI Journey - Political Memory Journey

THE FIVE CORE PRODUCT LOOPS

- Discovery: Find → Understand → Explore - Verification: Claim → Evidence → Sources → Verification → History - Pool Accountability: Observe → Report → Verify → Respond → Resolve - Public Resource Tracking: Money → Project → Evidence → Outcome - Political Memory: Event → Record → Response → Outcome → History

AI operates across all five.

HOMEPAGE

Homepage is the public entrance and should answer: “What is happening in Nigeria?”

Identity line: NIGERIANS.AFRICA — A PUBLIC RECORD OF NIGERIA.

Includes search and sections such as The Country, What People Are Facing, Political Memory, Follow the Money, Public Record, and Civic Action.

GOVERNMENT EXPLORER

Government represented as a navigable system: Federal Government (Executive, Legislature, Judiciary, other institutions), State Governments, Local Governments.

Navigation path: Institution → Office → Office Holder → Responsibility → Records.

PUBLIC PERSONALITY PROFILE

PPP is a first-class product experience focused on structured public record.

Includes Overview, Political Memory timeline, Promises & Statements, Claims & Evidence, Offices Held, Projects, Public Money, Responses, Sources.

Principle: Separate the person's public record from claims made about the person.

INFORMATION STATUS LANGUAGE

Status vocabulary: - Verified - Official Record - Reported - Unverified - Disputed - Corrected - AI Generated

States should be visible.

AUTHENTICATION

Authentication should remain visually secondary.

Flow: Public Information → Explore → Understand → Participate → Sign in when needed.

Accounts primarily for submitting reports, uploading evidence, following issues, participating in organizations, managing projects, and accountable actions.

RESPONSIVE DESIGN

Mobile priorities: Search, Map, Public records, Reporting, Civic guidance, AI assistance, Simple navigation.

Desktop strengths: Large maps, Timelines, Evidence comparison, Money flows, Data tables, Side-by-side source comparison, Research workflows.

DESIGN SYSTEM

Typography: strong editorial hierarchy, large page titles, readable body text, clear metadata/source typography.

Color: restrained civic palette; status/meaning over political affiliation.

Core components include public navigation, search, maps, timelines, evidence panels, source references, status labels, data tables, money-flow diagrams, project progress, report submission, AI explanation panels, public-record sections, relationship navigation.

SIGNATURE INTERACTION

Follow the thread.

Problem → Who is responsible? → Office → Who runs it? → Person → What have they done? → Project → Where did the money go? → Evidence → What did citizens report? → What did government say? → What can I do?

CORE DESIGN STATEMENT

Nigerians.africa is not a dashboard of government. It is a public window into the country.

Public life should be: Visible, Navigable, Understandable, Verifiable, Actionable, Remembered.

Not an app people log into. A public record people enter.

PRODUCT NORTH STAR

Every significant interaction should help answer: - What is happening? - Who is responsible? - What evidence exists? - What has been done? - Where did the money go? - What can I do? - What happened afterward?

BRAND NORTH STAR

Nigerians.africa represents that Nigeria should be understandable to people who live in it, participate in it, study it, report on it and care about it.

Brand posture: - National in scope - African in identity - Public in ownership - Evidence-based in operation - Independent in presentation

Central promise: See Nigeria. Understand the record. Follow the thread.
